discover the spirit

The No. 1 for your success

From June 16-26, 2020, the future will be the guest of honor in Düsseldorf. drupa, the world's leading trade fair, is where the latest trends and future technologies for the global print industry take off and enjoy the spotlight. This is a premium event where "education, engagement, and entertainment" are focal points amid a fascinating, inspiring atmosphere. The motto for drupa's eleven-day run? Embrace the future. In a time of continuous change and transformation, drupa 2020 is a must-attend event for the industry - the fair provides orientation, creates crucial momentum for sustainable, future-oriented business models, and last but not least, offers the best environment for networking and making excellent new business contacts.

move forward

Get connected

drupa 2020 is the must-attend event for everyone who wants to get up close and personal with the latest innovations from around the world. It's where innovative applications from the print media industry, industrial and functional printing, to packaging production captivate visitors. The international printing and packaging industry as well as experts from vertical markets such as food, non-food, pharmaceuticals, cosmetics, luxury goods, and many more all come together in Düsseldorf.

drupa provides the opportunity for professional exchange at the highest level, so you can discover innovative business models, examples of the best practices, groundbreaking concepts, technological innovations, and solutions for your success in business.

Approximately 1,800 exhibitors from 54 countries, an international audience from 183 countries*, and special shows of the highest caliber such as cube, dna, touchpoint packaging, touchpoint 3D fab+print, touchpoint textile, and other highlights prove once again that drupa is the global hub, with no other event matching it in terms of significance for the entire international industry.

engage - entertain - educate

The drupa cube 2016 was a great success with our delegates. We delivered presentations, workshops, and discussions led by a range of inspirational international speakers. For 2020 we plan to build on that success. In the drupa cube delegates and exhibitors can get actionable insights on business trends, leadership best practices, and print futures that they can take back to apply and implement in their own companies. The cube is free to all visitors and our goal is to help you deliver business transformation and improved competitive advantage for your company and greater value to your customers.

Michael Gale
drupa 2020
Innovation Partner
Keynote Speaker

Keynote presentations

from globally respected business leaders and visionaries.

Executive think tanks

Sessions with our major content contributors designed for board-level delegates (preregistration required with limited numbers of participants).

Business evolution presentations

that cover a broad range of topics including consumer trends, sales and marketing, environmental considerations, as well as business planning and strategy.

Print futures

Stimulating presentations in which print experts share their perspectives and predictions on the future of print technology and what that means to the industry.

Brand stories

Innovative cross-sectional technologies make up dna's main area of focus:

- Advanced Manufacturing
- Digital Direct Manufacturing
- AI & Robotics
- New Materials
- Bioprinting
- New Business Models

The print industry of tomorrow is exploring new horizons - join in on the journey!

drupa 2020 has established a special new area: dna - drupa next age, the center of disruptive developments. This is the innovative heart of drupa, a transparent hall and stand concept that creates a networking space where global players, start-ups, and key players in the industry can engage in productive exchange about new product ideas, prototypes, and business models, as well as present new approaches, solutions, and technologies for relevant cross-sectional technologies in the print, media, and packaging industry. The clear and open exhibition area is grouped around the central dna stage, the epicenter for talks and carrying on discussions. Get inspired by numerous visionaries from a wide array of industries!

www.drupa.com/dna-en

In the dna framework program, experts work with current formats such as perfect matches, elevator pitches, and the 3-minds-1-vision method to find the answers to three topic clusters:

NXT CHALLENGE

What major hurdles do we anticipate in the print industry? Companies established in the industry will present their innovative products and forward-looking ideas here.

NXT SOLUTION

What solutions can we use to overcome these hurdles? Up-and-coming game-changers and representatives from innovative start-ups answer this question for us.

NXT HORIZON

What does the world of tomorrow look like, and what significant contributions will the print industry make to it? Key speakers give us a look at their founded expertise.

Discover trends, find solutions and visions

Discover and understand packaging trends. See and touch advanced solutions. Get inspired by visionary concepts. Meet packaging experts to learn about future challenges and opportunities. In one single location you will embrace the future of packaging design and production. The forum covers various printing technologies, market segments, and packaging types. This is the perfect place to be for brand owners, designers, material suppliers, converters, and overall experts in the packaging industry.

touchpoint packaging is a drupa initiative in partnership with:

drupa
touchpoint

Additive manufacturing: Inspiration and three-dimensional experience

At the drupa touchpoint 3D fab+print, experts from the AM world (additive manufacturing) shed light on 3D printing and its diverse possibilities - from design to the production processes, materials, and the many and varied areas of application for successful technologies. In numerous specialist lectures from technology providers and users, you'll get to experience fascinating examples of successful AM technologies for the manufacturing of machine and spare parts, tools, promotional items, and objects of utility.

The additive manufacturing working group in VDMA, which is responsible for both designing the content and running the ten-day lecture program, offers about 80 specialist lectures during drupa's run.

touchpoint
textile

Digital Textile Micro Factory

Digital and industrial textile printing offers enormous potential for growth. In the textile printing trend forum, you'll see applications in various industries such as textile direct printing, screen printing, transfer printing, and digital printing. In touchpoint textile, a new approach to technology awaits you with the Digital Textile Micro Factory, a 3D simulation that connects directly to production and shows how clothing can be produced on demand and individually. Experience a fully networked, integrated production chain - from design to finished product. Discover a milestone in the fashion industry on the way to Industry 4.0.

Europe's biggest textile research center, the German Institutes of Textiles and Fiber Research in Denkendorf (DITF), coordinates the trade fair showcase and will be on hand with their expertise from application-based research to discuss the entire textile production chain.
