PK AUTOMATIC INTELLIGENT CUTTING SYSTEM

PK automatic intelligent cutting system adopts fully automatic vacuum chuck and automatic lifting and feeding platform. Equipped with various of tools, it can quickly and precisely make through cutting, half cutting, creasing and marking. It is suitable for sample marking and short-run customized production for signs, printing and packaging industries. It is a cost-effective smart equipment that meets all your creative processing.

Features

01 Built-In Computer

Computer will automatically install the software and prepare iECHO for work. The built-in computer can also operate in Wi-Fi mode.

02 QR Reading System

iECHO software supports QR code scanning to retrieve relevant cutting files saved in the computer to conduct tasks, which meets the customers' needs for cutting different types of materials and patterns automatically and continuously, saving human time and labor.

03 Automatic Sheet Loading System

Suitable for different kinds of materials automatic processing in short-run production. It can automatically load sheets up to 1200 mm on the cutting table continuously.

04 High Precision Vision Camera (CCD)

With high definition CCD camera, it can make automatic and accurate registration contour cutting of various printed materials, to avoid manual positioning and printing error, for simple and accurate cutting.

05 Roll Material Feeding System

The roll materials feeding system adds additional value to PK models, which can not only cut sheet materials but also roll materials such as vinyl to make labels products, maximizing customers' profits by using iECHO PK.
