

A CLEARER VISION FOR THE PERFECT FINISH

Neptune PB

fully automated double sided B3 laminator

The Neptune PB is a uniquely configured, fully automatic double-sided laminator for sheets up to B3 size.

Compact and easy to use the Neptune PB is designed for the growing photobook and print-on-demand market.

The twin laminating stations give an identical finish on both sides of the sheet whilst other features make it equally adept at running both digital and lithographic output.

The suction feeder offers a deep pile for longer run work and is easily adjustable for a variety of different sheet sizes.

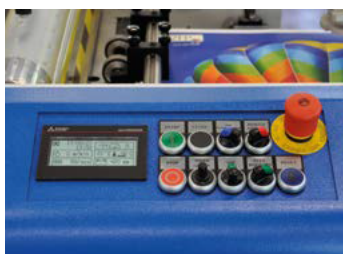

A decurl bar, which may be altered on the run, is fitted to assist in giving a flat result when laminating on one side only.

A missing sheet detector helps to prevent unwanted wraparounds.

The positioning of the perforator overcomes any potential issues caused by poor film roll profiles and allows greater speed and decurl angles minimising web breakage.

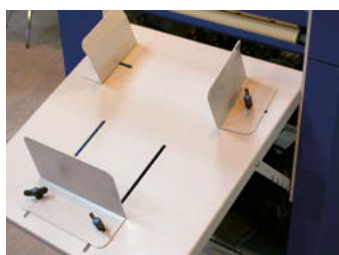

The centralised control panel offers ease of operation.

The electronically adjustable burster automatically separates sheets up to B3 size whilst fans provide a cushion of air to support the sheet as it is delivered into the catch tray.

Both upper and lower mandrels have a hinged support and the lower mandrel has a perforator mounted above it to aid separation.

The standard catch tray may be adjusted to suit various sizes.
