

## PRODUCT INFO

# PRISCO® SALT CRYSTAL REMOVER & ALKALINE PAPER ROLLER RINSE

**Product Description:** These products remove calcium carbonate as well as other salt build-ups and glazes on press rollers. The products will keep rollers cleaner, prevent roller stripping and promote more consistent color.

**PRISCO Salt Crystal Remover** is intended for deep cleaning when there is a visible calcium build-up and as the first step of a total maintenance program.

**PRISCO Alkaline Paper Roller Rinse** is intended for regular follow-up use.

### Advantages:

- Prevents calcium salt build-up and roller glazing
- No offensive odor
- Far more effective than most similar cleaners

**Directions:** For thorough cleaning, **PRISCO Salt Crystal Remover** is usually best applied by hand to rollers removed from the press. It may also be applied to localized areas of rollers on press, as needed, after regular maintenance.

To use **PRISCO Alkaline Paper Roller Rinse**, wash-up rollers as usual. When rollers are clean and dry, disengage wash-up blade and apply either product liberally across the rollers. Let the solutions run in for 2 to 4 minutes, then engage wash-up blade. Apply additional solution for 1 to 2 minutes, and then rinse off with an application of water and presswash.

**Product Code: Alkaline Paper Roller Rinse C826; Salt Crystal Remover C825**
